

Underlying Cause of Death, 2018-2024, Single Race Results

Deaths occurring through 2024

State	Deaths	Population	Crude Rate Per 100,000 (95% Confidence Interval)
Alabama (01)	298	5,157,699	5.8 (5.1 - 6.4)
Alaska (02)	66	740,133	8.9 (6.9 - 11.3)
Arizona (04)	1,326	7,582,384	17.5 (16.5 - 18.4)
Arkansas (05)	342	3,088,354	11.1 (9.9 - 12.2)
California (06)	2,940	39,431,263	7.5 (7.2 - 7.7)
Colorado (08)	1,006	5,957,493	16.9 (15.8 - 17.9)
Connecticut (09)	501	3,675,069	13.6 (12.4 - 14.8)
Delaware (10)	114	1,051,917	10.8 (8.8 - 12.8)
District of Columbia (11)	51	702,250	7.3 (5.4 - 9.5)
Florida (12)	4,434	23,372,215	19.0 (18.4 - 19.5)
Georgia (13)	992	11,180,878	8.9 (8.3 - 9.4)
Hawaii (15)	185	1,446,146	12.8 (10.9 - 14.6)
Idaho (16)	381	2,001,619	19.0 (17.1 - 20.9)
Illinois (17)	1,621	12,710,158	12.8 (12.1 - 13.4)
Indiana (18)	827	6,924,275	11.9 (11.1 - 12.8)
Iowa (19)	797	3,241,488	24.6 (22.9 - 26.3)
Kansas (20)	511	2,970,606	17.2 (15.7 - 18.7)
Kentucky (21)	536	4,588,372	11.7 (10.7 - 12.7)
Louisiana (22)	412	4,597,740	9.0 (8.1 - 9.8)
Maine (23)	441	1,405,012	31.4 (28.5 - 34.3)
Maryland (24)	919	6,263,220	14.7 (13.7 - 15.6)
Massachusetts (25)	1,348	7,136,171	18.9 (17.9 - 19.9)
Michigan (26)	1,705	10,140,459	16.8 (16.0 - 17.6)
Minnesota (27)	1,650	5,793,151	28.5 (27.1 - 29.9)
Mississippi (28)	411	2,943,045	14.0 (12.6 - 15.3)
Missouri (29)	1,034	6,245,466	16.6 (15.5 - 17.6)
			18.9

Montana (30)	215	1,137,233	(16.4 - 21.4)
Nebraska (31)	252	2,005,465	12.6 (11.0 - 14.1)
Nevada (32)	392	3,267,467	12.0 (10.8 - 13.2)
New Hampshire (33)	316	1,409,032	22.4 (20.0 - 24.9)
New Jersey (34)	711	9,500,851	7.5 (6.9 - 8.0)
New Mexico (35)	284	2,130,256	13.3 (11.8 - 14.9)
New York (36)	2,107	19,867,248	10.6 (10.2 - 11.1)
North Carolina (37)	1,985	11,046,024	18.0 (17.2 - 18.8)
North Dakota (38)	123	796,568	15.4 (12.7 - 18.2)
Ohio (39)	2,175	11,883,304	18.3 (17.5 - 19.1)
Oklahoma (40)	951	4,095,393	23.2 (21.7 - 24.7)
Oregon (41)	999	4,272,371	23.4 (21.9 - 24.8)
Pennsylvania (42)	2,487	13,078,751	19.0 (18.3 - 19.8)
Rhode Island (44)	270	1,112,308	24.3 (21.4 - 27.2)
South Carolina (45)	778	5,478,831	14.2 (13.2 - 15.2)
South Dakota (46)	208	924,669	22.5 (19.4 - 25.6)
Tennessee (47)	1,205	7,227,750	16.7 (15.7 - 17.6)
Texas (48)	2,688	31,290,831	8.6 (8.3 - 8.9)
Utah (49)	410	3,503,613	11.7 (10.6 - 12.8)
Vermont (50)	197	648,493	30.4 (26.1 - 34.6)
Virginia (51)	1,017	8,811,195	11.5 (10.8 - 12.3)
Washington (53)	1,256	7,958,180	15.8 (14.9 - 16.7)
West Virginia (54)	375	1,769,979	21.2 (19.0 - 23.3)
Wisconsin (55)	1,968	5,960,975	33.0 (31.6 - 34.5)
Wyoming (56)	91	587,618	15.5 (12.5 - 19.0)
Total	48,308	340,110,988	14.2 (14.1 - 14.3)

Notes:

Caveats: The method used to calculate 95% confidence intervals is documented here: [More information.](#) (/wonder/help/ucd-expanded.html#Confidence-Intervals)

The population figures for year 2024 are single-race estimates of the July 1 resident population, from the Vintage 2024 postcensal series released by the Census Bureau on June 27, 2024. The 2024 series is based on the Modified Blended Base produced by the US Census Bureau in lieu of the April 1, 2020 decennial population count. The Modified Blended Base consists of the blend of Vintage 2020 postcensal population estimates for April 1, 2020, 2020 Demographic Analysis Estimates, and 2020 Census data from the internal Census Edited File (CEF). The population figures for year 2023 are single-race estimates of the July 1 resident population, from the Vintage 2023 postcensal series released by the Census Bureau on June 27, 2024. The 2023 series is based on the Modified Blended Base produced by the US Census Bureau in lieu of the April 1, 2020 decennial population count. The Modified Blended Base consists of the blend of Vintage 2020 postcensal population estimates for April 1, 2020, 2020 Demographic Analysis Estimates, and 2020 Census data from the internal Census Edited File (CEF). The population figures for years 2022 are single-race estimates of the July 1 resident population, from the Vintage 2022 postcensal series released by the Census Bureau on June 22, 2023. The 2022 series is based on the Modified Blended Base produced by the US Census Bureau in lieu of the April 1, 2020 decennial population count. The

Modified Blended Base consists of the blend of Vintage 2020 postcensal population estimates for April 1, 2020, 2020 Demographic Analysis Estimates, and 2020 Census data from the internal Census Edited File (CEF). The population figures for years 2021 are single-race estimates of the July 1 resident population, based on the Blended Base produced by the US Census Bureau in lieu of the April 1, 2020 decennial population count, from the Vintage 2021 postcensal series released by the Census Bureau on June 30, 2022. The population figures for year 2020 are single-race estimates of the July 1 resident population, from the Vintage 2020 postcensal series based on April 2010 Census, released by the Census Bureau on July 27, 2021. The population figures for year 2019 are single-race estimates of the July 1 resident population, from the Vintage 2019 postcensal series based on April 2010 Census, released by the Census Bureau on June 25, 2020. The population figures for year 2018 are single-race estimates of the July 1 resident population, from the Vintage 2018 postcensal series based on April 2010 Census, released by the Census Bureau on June 20, 2019. [More information.](#) ([/wonder/help/ucd-expanded.html#Population Data](#))

The population figures used in the calculation of death rates for the age group 'under 1 year' are the estimates of the resident population that is under one year of age. [More information.](#) ([/wonder/help/ucd-expanded.html#Age Group](#))

Connecticut population estimates for 2022 and later years are reported for 9 planning regions as county equivalent areas, instead of the former 8 legacy counties in the Vintage 2022 postcensal series released by the Census Bureau on June 22, 2023, and in the Vintage 2023 postcensal series released by the Census Bureau on June 27, 2024. Populations estimates for the former counties are not available for 2022 and later years. [More information.](#) ([/wonder/help/ucd-expanded.html#Connecticut-2022](#))

After the creation of the final 2023 dataset, North Carolina updated the cause of death information for over 900 death certificates to include a cause of death code indicating drug overdose (ICD-10 underlying cause-of-death codes: X40-X44, X60-X64, X85, and Y10-Y14). Jurisdictions can continue to update death certificates after the closing of the mortality file. As a result, users should consider that the actual death count for drug overdose deaths for North Carolina in 2023 is over 4,400 deaths, with a crude rate of approximately 41.0 per 100,000 population, and an age-adjusted rate of approximately 42.1 per 100,000 population. These deaths will not be updated on the final mortality datasets.
